

Innovaccer's Gravity Recognized as the 2026 Best in KLAS Data & Analytics Platform

“What matters most to us is how our customers experience Innovaccer in their day to day operations. These scores reinforce that healthcare organizations see real value in a connected foundation that brings data, intelligence, and workflows together to support better decisions across care delivery and operations.”

Abhinav Shashank

Co-founder and CEO, Innovaccer

Executive Summary

Innovaccer Gravity has been recognized as the highest-scoring Data and Analytics Platform in the [2026 Best in KLAS Awards: Software and Services Report](#), achieving a score of **93.2 out of 100**. This marks the first time Innovaccer Gravity has received the Best in KLAS score in this category, reflecting strong customer-rated performance in helping healthcare organizations transform data into actionable insights and measurable outcomes.

KLAS defines Data & Analytics Platforms as software that provides enterprise analytics and reporting on clinical, operational, and financial data. These solutions ingest, analyze, and display results, often through dashboards or scorecards—to help non-IT users understand and act on the data.

KLAS Research: Amplifying the Voice of Providers and Payers

Unedited customer comments collected by KLAS

Innovaccer has been a great partner in allowing us to wrangle and work with a variety of different data sources. The pro is that we feel like we can throw data at the vendor, and they will ask a lot of good questions. They really want to understand the data and how to model it.

– VP/Other Executive
August 2025

We have been using Innovaccer's solutions and have been happy with them. Innovaccer's products definitely support our integration goals. The ease of use is also pretty good. Their ability to drive tangible outcomes has been excellent. That is why we are using Gravity.

– Manager
December 2025

Right now, the product and the functionality that we have are roughly a third of the cost of what we paid for staffing things internally with all of our technical teams, for equipment, and for maintenance agreements. The product is very cost-effective for us.

– Director
August 2025

I like the fact that I can access information on my patients through integration. Data Platform is a timely warehouse and repository, and I like that. I also like that I can find information readily at a global level or at a drill-down level. That is really important.

– Director
August 2025

We didn't know how to build algorithms, and Innovaccer came in and had the right people with the right skill set, the right tool, and the ability to apply AI within a health intelligence cloud. Otherwise, we would have started pulling in too many outside generative AI solutions and tons of garbage. Innovaccer's cloud protects us from all that noise, the bias, and all the other things.

– CMO
May 2025

Innovaccer has been very willing to grow with us, especially on the data side. For them to creatively figure out how to pull data from over 100 practices and another vendor's large system, standardize it, and make it readable and trackable was a significant achievement. Many vendors would not have attempted that level of data ingestion and normalization, and there was a learning curve in understanding who we were and how our network operated. Innovaccer adapted their out-of-the-box data processes to meet our unique configuration, and their flexibility, proactive service, and willingness to meet us where we are have all been strengths.

– VP/Other Executive,
December 2025

Innovaccer Scores Best in KLAS Across Three Categories

In 2026, Innovaccer has demonstrated excellence across multiple healthcare technology categories:

Customer Relationship Management (CRM):

Score of **90.1**, maintaining the top position for the third consecutive year
